RESEARCH

My research combines modern concepts in computer graphics, computer vision, machine learning and human computer interaction, with broad applications in 2D/3D digital contents analysis, synthesis and authoring. In particular, I am interested in *interactive/predictive* modeling and *deep learning-based* reconstruction of high-fidelity face, hair and body for digital human.

EDUCATION

University of Hong Kong PhD in computer science, advised by Dr. Li-Yi Wei	2012.09—2016.12
University of Science and Technology of China (USTC) Bachelor in Electronic Engineering and Information	2008.09—2012.06

WORK EXPERIENCE

USC Institute for Creative Technologies Postdoctoral researcher, Vision and Graphics Lab, Los Angeles	2017.05—present
Adobe Research Graphics research intern, Procedural Imaging Group, San Jose	2016.07—2016.09
Autodesk Research HCI Graphics research intern, UI Group, Toronto	2016.01—2016.04
Microsoft Research Asia Graphics research intern, Visual Computing Group, Beijing	2014.12—2015.04

MORE RESEARCH EXPERIENCE

Strip-based Hair Modeling in VR

2017.08 — present

We provide a 3D VR authoring interface for immersive interaction with the hair models. Our system combines the flexibility of manual authoring, the convenience of data-driven automation for high quality hair modeling.

Autocomplete VR painting

2016.07 — present

The goal is to handle different types of repetitions in VR painting, including the detail decorative strokes, the surface strokes, and even higher-level scaffold, in a simple and general framework.

Interactive Facial Hair Editing and Synthesis

2017.06 — present

Users can design facial hairs of different shapes/lengths/densities via simple sketching, while keeping the style of a target facial hair defined by an exemplar image.

Perspective Undistortion of Unconstrained Portrait Photos

2018.03 — present

We present a deep learning-based approach specially tailored for rectifying the facial distortion in an unconstrained portrait image.

Quantization Network

2018.02 — present

We present a simple/straightforward and general/uniform solution for any-bit weights and activations quantization, yet achieving higher performance than state-of-the-arts.

PATENTS

Techniques for Generating Dynamic Effects Animations

US filed by Autodesk (2016)

Stroke Operation Prediction for Three-Dimensional Digital Content

US filed by Adobe (2017), Pending

ACADEMIC SERVICE

Committee Member:

AAAI 2019

International Conference on Computational Visual Media (CVM) 2019

Pacific Graphics 2018

SIGGRAPH Emerging Technology 2017

Reviewer:

SIGGRAPH Asia 2017; CHI 2017; PG 2015, 2016; Computer & Graphics 2017;

IEEE Transactions on Cognitive and Developmental Systems 2017;

IEEE Computer Graphics and Applications 2016;

PROFESSIONAL SKILLS

Designer:

algorithm, system, UI/UX

Programmer:

C/C++, Qt, Python, Java, OpenGL/CV/VR, Unity

AWARDS

Excellent intern of Stars of Tomorrow Internship Program, Microsoft Research Asia	2015
HKU University Postgraduate Fellowships, HKU	2012-2015
Outstanding undergraduate, USTC	2012
Outstanding undergraduate research project, USTC	2011
Second prize in Mathematical Contest in Modeling	2011
National Scholarship, Ministry of Education, China	2011
National Inspirational Scholarship, Ministry of Education, China	2009, 2010
Outstanding Students Scholarship, USTC	2008, 2009
